

ABSTRACT OF THE DISCLOSURE

A system for operating/observing a monitoring device of a process controller device of/in a remote operator unit. An additional function block is provided in/on the monitoring device, which intervenes in the communication between the monitoring device and the connected operator units, at least partially takes over the functions that are to be executed by one or more of the operator units and processes the information to be displayed on the operator unit in such a way that the information can be directly displayed.
